

NAME OF THE EVENT: ARCHITECT

DESCRIPTION:

BUILD SIMPLE, BUT WORKING MODELS FROM DAILY USE ITEMS (POPSICLE STICKS, PAPER ETC.).

Civil Engineering is an art; a profession of creative ability and logic. Architect provides an opportunity for participants to unleash their innovation in designing an object of significance and splendour.

This event aims to harness practical design and constructional abilities of the participants.

Participants are required to prepare models for a predefined problem within a fixed time limit. The detailed problem statement will be given out on the spot. All materials required to make the model will be provided by the organizers. The models will later be put to test and teams fulfilling the winning criteria in the best way will be declared winners
